PROJECTS

Weather Appliction | *HTML, CSS, Javascript, APIs, GitHub, VS Code*

Nov. 2023

- Built a full-stack Weather Application, Get real-time weather data through APIs
- Application stands out for its incorporation of multi-language support, providing users with the flexibility to access weather information
- Learned how to include APIs in conjunction with backend database

E-Commerce | *Javascript, HTML/CSS, MongoDB, API, Git, VS Code*

Sep. 2023

- Developed user-centered E-commerce web application for Trendy Clothing
- MySQL, PostgreSQL, MongoDB, and other database management systems are used to store and manage product information, user data
- Using technologies like CSS3 and media queries to ensure that the website adapts to different screen sizes and devices.

FoodDropper | *Java, Maven, API (Spigot), Git, IntelliJ IDEA*

Aug. 2023

- Developed a Minecraft server plugin to limit players to one way of replenishing their hunger bar
- Used persistent data containers to save and load data, ensuring that it persists across plugin resets
- Optimized UX e.g. sound design, food drop timing, supplied saturation level, and addressed potential workarounds

EXPERIENCE

Interpe. | *Internship*

Dec. 2023

Completed a virtual internship in web-development which was for 1 month, learnt various new things, successfully built 4-mini projects

Competitive Programming Club | *Member*

Sept. 2023 – Present

Involved in the club centered around Competitive Programming

HOBBIES

Learning New Country Language

Dec. 2022

I learnt basic level Japanese language and also appeared for JLPT exam

Exercise (Gym)

I like give daily sometime for my health for that I like to do gym exercise, sometimes in week-ends I play lawn tennis
